About ShopWave

ShopWave is a modern Indian e-commerce platform offering a curated catalogue of electronics, fashion, home decor, beauty, sports, and food & snacks. Founded in 2022, the company serves over 2.4 million customers across 180 cities, with same-day delivery available in 14 metropolitan markets.

Business model

ShopWave operates a hybrid marketplace + private-label model. Roughly 60% of GMV comes from third-party sellers and 40% from in-house brands such as *Aurora* (audio), *Helix* (peripherals), *Studio* (apparel), and *Ember* (home fragrance). Private-label margins average 38% versus 14% on marketplace revenue, making house-brand expansion the most accretive lever on contribution margin.

2026 priorities

1. ****Launch the Spring 2026 catalogue**** – 84 new SKUs across six categories on 15 March, anchored by Aurora Buds Pro 3 and a Tide x ShopWave capsule.
2. ****Expand same-day delivery**** from 14 to 22 cities by Q3, with warehouse build-outs in Lucknow, Coimbatore, and Bhubaneswar.
3. ****Ship the new recommendations engine**** (cf-v7) to all customers by Q2, replacing the legacy popularity-ranked engine; A/B tests show a 9% lift in click-through and a 4% lift in revenue per session.
4. ****Reduce return rate**** from 11.2% to under 9% through better size guides, AR try-on for fashion, and stricter quality checks at the warehouse.

Key figures (FY25)

- Revenue: ₹1,840 Cr
- GMV: ₹3,210 Cr
- Active customers: 2.4 million
- Average order value: ₹1,612
- Repeat purchase rate: 41%
- NPS: 56

Technology

The platform runs on a Python/FastAPI core, PostgreSQL for transactional data, Elasticsearch for product search, and Redis for caching. The mobile app is React Native; the web storefront is Next.js. All services are deployed on Kubernetes across two AWS regions (ap-south-1 primary, ap-southeast-1 disaster recovery).
